

**REMARKS**

Each of the new claims is directed to compounds disclosed in the application as filed. It is noted that Applicants have explicitly included stereoisomers and enantiomers as within the subject matter of their invention as stated in original claims 1 and 39 as well as in the claims from which the new claims depend and in the specification at paragraphs [0021] and [0136].

Furthermore, it is noted that claims 86 through 89 inclusively depend, directly and indirectly, from claim 61 that the Examiner has previously indicated is allowable. Consequently, it is respectfully suggested that claims 86-89 are similarly allowable. The Examiner's concurrence and confirmation is respectfully requested.

If there are any additional charges in connection with this requested amendment, the Examiner is authorized to charge Deposit Account No. 12-1095 therefor.

Dated: April 26, 2004

Respectfully submitted,

By 

Harvey L. Cohen
